AMENDMENT NO. 2, TO MINIMUM TENTATIVE
REQUIREMENTS FOR OPERATING PROCEDURES
IN EGG DRYING
PLANTS

The 1944 Minimum Tentative Requirements for Facilities, Operating Procedures and Sanitation in Egg Breaking and Egg Drying Plants, released December 17, 1943. is hereby amended to provide the following revision:

Page 4, Paragraph D, sub paragraph VI, line eleven; the word "shall" is changed to "should". As amended it now reads:

"In any case where liquid is held more than six hours, provision should be made so that the egg meat temperature is reduced to 40°F. or below within 30 minutes after breaking and is maintained at 40°F. or below until drying or freezing."

Page 6, Paragraph B, sub paragraph III, line 2; the word "shall" is changed to "should". As amended it now reads:

"In any case where liquid egg is held more than six hours, the temperature of the egg meat should be 40°F. or less within 30 minutes after breaking and maintained at 40°F. or less until drying or freezing."

Page 12, Paragraph K, sub paragraph III first sentence; "dust house or any other part of the drying unit" is eliminated. As amended the paragraph now reads:

"Sweep-down powder is the powder which is recovered in the clean-up process from the primary or secondary chamber, bag collector, and conveyors. Sweep-down powder may be blended only in accordance with a method approved by an authorized representative of F.D.A. when powder is to be delivered to a Governmental agency."
